			ART UNIT 2178	PAPER NUMBER
			MAIL DATE 03/31/2009	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/084,258	Applicant(s) HEGDE ET AL.	
	Examiner KYLE R. STORK	Art Unit 2178	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 January 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,5-21 and 23-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,5-21 and 23-27 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This final office action is in response to the amendment filed 30 January 2009.
2. Claims 1-3, 5-21, and 23-27 are pending. Claims 23-27 are newly added.
Claims 1, 10, and 16 are independent claims.

The rejection of claims 1-3 and 5-7, 9-14, and 16-20 under 35 USC 102 over Armstrong et al. (US 6985934, filed 23 October 2000, hereafter Armstrong has been withdrawn as necessitated by the amendment.

The rejection of claims 8, 15, and 21 under 35 USC 103 over Armstrong and further in view of Crow et al. (US 6262724, filed 1999, hereafter Crow).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2178

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-3, 5-7, 9-14, 16-20, and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong et al. (US 6985934, filed 23 October 2000, hereafter Armstrong), and further in view of Hedge et al. (US 2002/0169797, filed 11 January 2002, hereafter Hedge).

As per independent claim 1, Armstrong discloses a method comprising:
automatically determining when an internet browser of a network device on a network has requested access to a rich media presentation (Figure 1A; Figure 3, item 301; column 7, lines 25-29: Here, a client computer, which is a network device (see column 6, lines 42-47), connects to a server)

detecting one or more attributes relating to rich media presentation capabilities of one or both of the internet browser and the network device (Figure 1B; Figure 3, items 302-303; column 7, lines 44-51)

selecting an appropriate rich media presentation to be sent to the internet browser from among a plurality of rich media presentations based on the detected one or more attributes (Figure 1C-1E; Figure 3, items 304-305; column 8, lines 4-19: Here, an appropriate rich media presentation is selected to be sent to the internet browser based upon a pre-established preference ranking)

Armstrong fails to specifically disclose the presentation package including a virtual player configured to play the media package. However, Hedge discloses

Art Unit: 2178

including a virtual player configured to play the media package (Figures 6 and 13; paragraph 0086). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to have combined Hedge with Armstrong, since it would have allowed a user to view presentations, even if his/her machine originally did failed to have a multimedia player.

As per dependent claim 2, Armstrong discloses wherein detecting one or more attributes comprises detecting two or more attributes from an operating system attribute, a plug-in attribute, a browser type attribute, a firewall attribute, a monitor setting attribute, a language attribute, a bandwidth attribute or a protocol attribute (column 5, lines 41-62; column 10, lines 17-32: Here, the system may include a communications interface. This communication interface specifies the bandwidth and protocol for transfer of data. Further, as being part of the system, these attributes are detected when the server queries the hardware and software capabilities of the system).

As per dependent claim 3, Armstrong discloses determining when one or both of the internet browser and the network device supports playing the rich media presentation, configuring the rich media presentation based on the detected attributes when a determination is made that playing of the rich media presentation is supported, otherwise, causing a supported presentation to be sent to the internet browser (column 8, lines 4-19).

As per dependent claim 5, Armstrong discloses allowing a client to modify one or more characteristics associated with the rich media presentation (column 9, lines 1-41:

Art Unit: 2178

Here, a user can modify the characteristics of the presentation, such as turning on/off audio and/or video).

As per dependent claim 6, Armstrong discloses wherein causing the selected rich media presentation to be sent to the network device comprises utilizing an ad serving engine (column 2, lines 4-42).

As per dependent claim 7, Armstrong discloses wherein causing the selected rich media presentation to be sent to the network device comprises utilizing an email serving engine (column 9, lines 23-32).

As per dependent claim 9, Armstrong discloses wherein selecting the appropriate rich media presentation comprises:

- selecting a virtual player configured for the network device (column 8, lines 44-67)

- selecting a presentation package configured for the network device (Figure 1C-1E; Figure 3, items 304-305; column 8, lines 4-33)

- selecting a media package for the network device (Figure 1C-1E; Figure 3, items 304-305; column 8, lines 4-33)

As per claims 10 and 16, the applicant discloses the limitations substantially similar to those in claim 1. Claims 10 and 16 are similarly rejected.

As per claims 11 and 17, the applicant discloses the limitations substantially similar to those in claim 3. Claims 11 and 17 are similarly rejected.

As per dependent claims 12 and 18, Armstrong discloses wherein the rich media presentation is configured to be presented with a banner ad that is selectable to cause an action to be performed (column 1, line 56- column 2, line 42).

As per claims 13 and 19, the applicant discloses the limitations similar to those in claim 6. Claims 13 and 19 are similarly rejected.

As per claim 14 and 20, the applicant discloses the limitations similar to those in claim 7. Claims 14 and 20 are similarly rejected.

As per dependent claim 23, Armstrong further discloses causing the selected rich media presentation to be sent to the internet browser (Figure 1C-1E; Figure 3, items 305-306; column 8, lines 44-50).

As per dependent claims 24, Armstrong further discloses the one or more attributes including at least one of: an operating system type attribute, a plug-in attribute, a browser type attribute, a firewall attribute, a monitor setting attribute, a language attribute, a bandwidth attribute, or a protocol attribute (column 2, lines 22-42; column 5, lines 41-62: Here, one piece of software often contained within a browser for playback of specialized formats such as MPEG, QTF, and AVI are plug-ins. Similarly, the hardware and software capabilities of the network device are determined. This determination step would include determining if plug-ins allowing for playback of formats such as MPEG, QTF, and AVI are installed).

As per dependent claims 25 and 27, the applicant discloses the limitations substantially similar to those in claim 24. Claims 25 and 27 are similarly rejected.

As per dependent claim 26, the applicant discloses the limitations substantially similar to those in claim 23. Claim 26 is similarly rejected.

6. Claims 8, 15, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong and Hedge, and further in view of Crow et al. (US 6262724, application 1999, hereafter Crow).

As per dependent claim 8, Armstrong discloses the limitations similar to those in claim 5, and the same rejection is incorporated herein. Armstrong fails to specifically disclose delivering an image to the device that is displayed on the device at a location relating to the rich media presentation. Crow further discloses the method comprising delivering an image to the device that is displayed on the device at a location relating to the rich media presentation (Figure 4, items 248 and 250: Here, the media source icons are images displayed on the device and the location is related to the corresponding presentation). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to have combined Crow with Armstrong, since it would have allowed a user to view an image representing the presentation prior to displaying the entire presentation.

As per claims 15 and 21, the applicant discloses the limitations similar to those in claim 8. Claims 15 and 21 are similarly rejected.

Response to Arguments

7. Applicant's arguments with respect to claims 1-3, 5-21, and 23-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KYLE R. STORK whose telephone number is (571)272-4130. The examiner can normally be reached on Monday-Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hong can be reached on (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
